

pdf-studio

A thin, type-safe wrapper around ReportLab for developers who need real PDFs — tables, charts, headers, KPIs — without 300 lines of boilerplate. This document was generated by pdf-studio itself.

What's Inside

- Three research-backed themes (cypher / ledger / slate) — WCAG-AA verified
- Declarative templates: data → styled PDF in one call
- Real bold/italic via bundled Inter, Lora, JetBrains Mono TTFs
- Vector charts (matplotlib → SVG → PDF) — crisp at any zoom
- Styled tables with zebra striping, right-aligned numerics, captions
- KPI summary cards with green/red deltas
- Running headers with {page} / {total} placeholders
- Zero required dependencies beyond reportlab

Theme Palettes

Each theme is a complete visual language. Switching themes recolors headings, tables, charts, KPIs, bullets — no code changes.

Cypher Theme

Navy foundation, teal accent. The brand default.

cypher colour roles

Role	Hex	Preview
foundation	#0B1121	
accent (fills)	#2DD4BF	
good (up)	#047857	
bad (down)	#B91C1C	
surface (cards)	#F8FAFC	
body text	#1F2937	
muted text	#64748B	
grid lines	#E2E8F0	

Ledger Theme

Deep-green foundation, gold accent. Finance-optimised.

ledger colour roles

Role	Hex	Preview
foundation	#064E3B	
accent (fills)	#B45309	
good (up)	#047857	
bad (down)	#B91C1C	
surface (cards)	#F0FDF4	
body text	#1F2937	
muted text	#374151	
grid lines	#D1FAE5	

Slate Theme

Indigo foundation, amber accent. Contemporary, warm.

slate colour roles

Role	Hex	Preview
foundation	#312E81	
accent (fills)	#D97706	
good (up)	#047857	
bad (down)	#B91C1C	
surface (cards)	#EEF2FF	
body text	#334155	
muted text	#475569	
grid lines	#E0E7FF	

Typography & Components

Heading Hierarchy

Level 1 — Section Heading

Level 2 — Subsection

Level 3 — Detail

Body text uses the theme's body_text colour (Inter Regular). Bold and italic resolve to real bundled TTF weights — Inter-Bold, Lora-Italic, JetBrainsMono-Bold. No synthetic rendering.

KPI Summary Cards

AUM	Realised P&L;	Max Drawdown	Sharpe Ratio
₹1.24 L	₹8.3 K	-6.2%	1.84
+4.1%	+12.4%	-0.8%	+0.12

Feature Bullets

- Theme dataclass with 3 presets — one object, entire document recolored
- Document.from_template() — structured data → styled PDF in one call
- Charts render as vector SVG → PDF (crisp at any zoom level)
- Tables from pandas DataFrame or list-of-lists with right-aligned columns
- Thread-safe font registration with double-checked locking

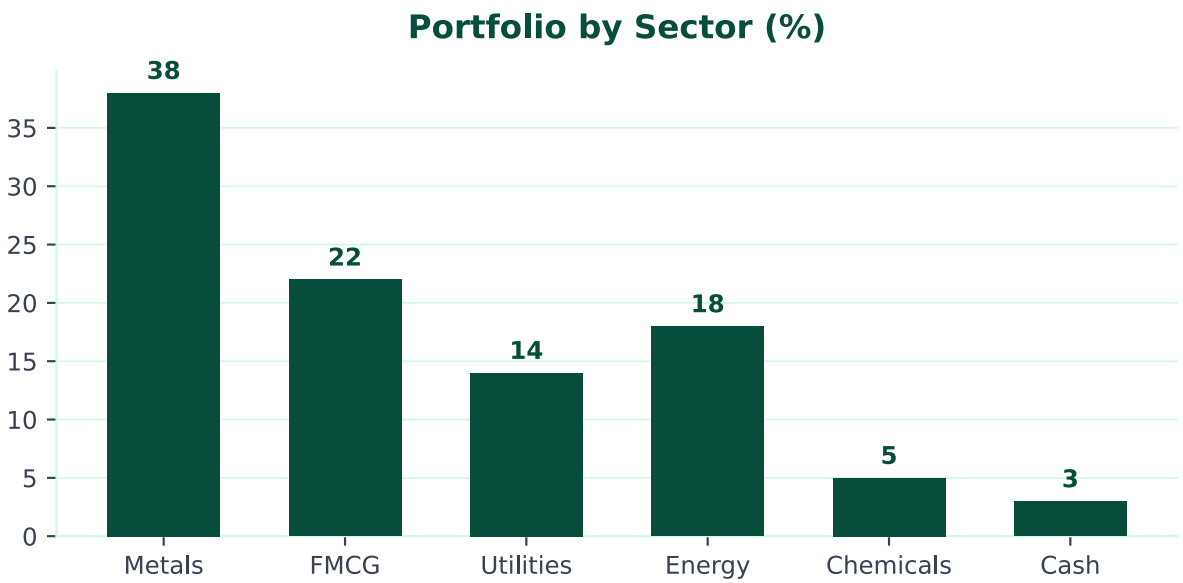

Tables & Standard Charts

Holdings Table

Table 1 — Portfolio positions (numeric columns right-aligned)

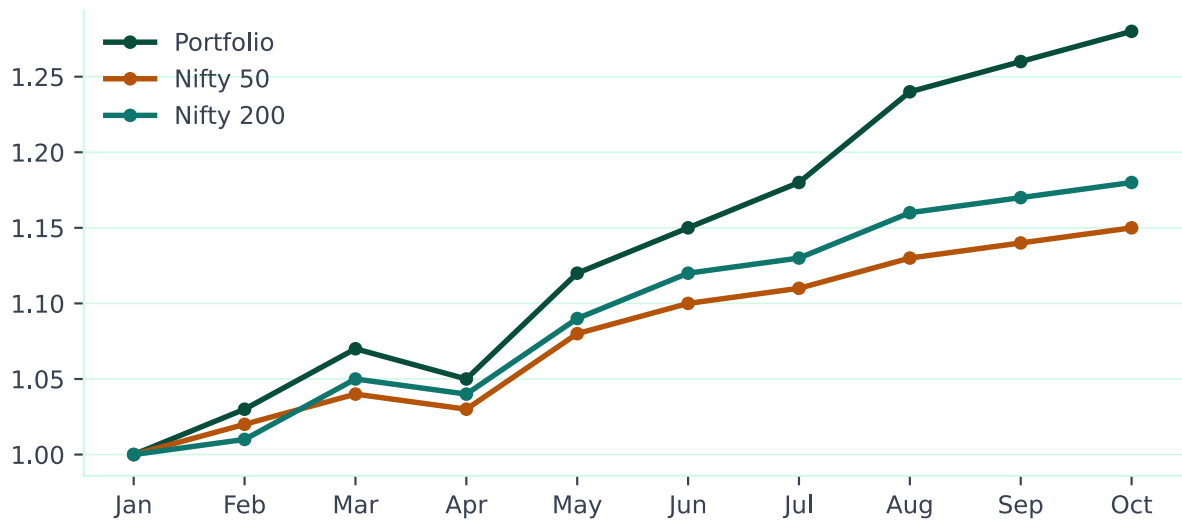

Holding	Sector	Qty	Avg Cost	LTP	Value	P&L;	P&L; %
VEDL	Metals	50	₹285	₹312	₹15,600	₹1,350	+9.5%
ITC	FMCG	20	₹412	₹445	₹8,900	₹660	+8.0%
POWERGRID	Utilities	15	₹198	₹224	₹3,360	₹390	+13.1%
NMDC	Metals	50	₹156	₹172	₹8,600	₹800	+10.3%
CASTROLIND	Energy	30	₹134	₹142	₹4,260	₹240	+6.0%
SRF	Chemicals	4	₹2,450	₹2,620	₹10,480	₹680	+6.9%

Bar Chart — Sector Allocation

Line Chart — Equity Curve vs Benchmark

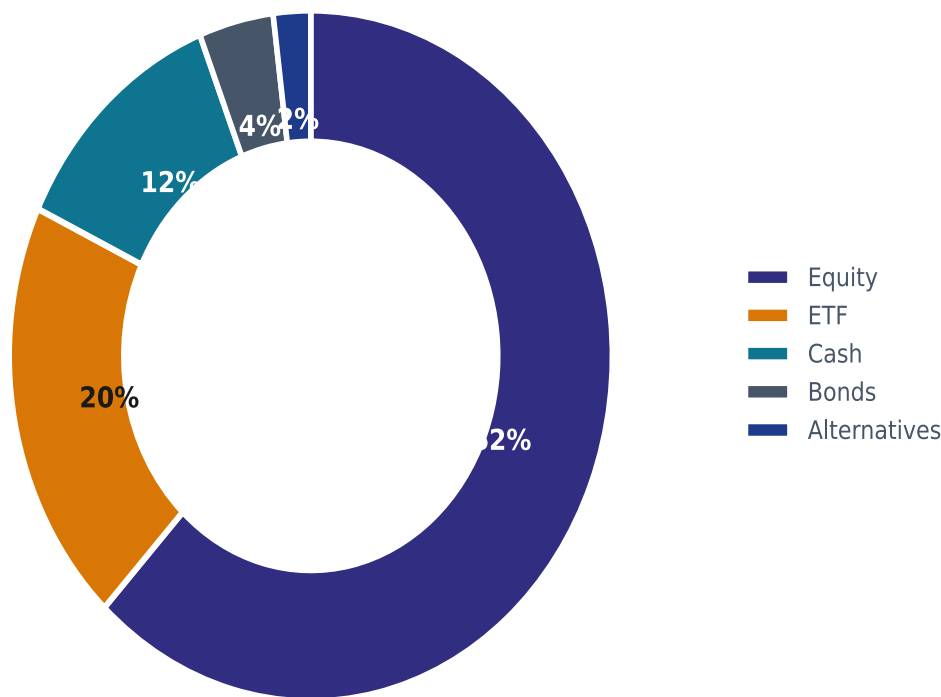

Normalised Returns (Jan = 1.00)

Composition & Correlation

Donut Chart — Asset Composition

Allocation Breakdown

Heatmap — Sector Correlation Matrix

Cross-Sector Correlation

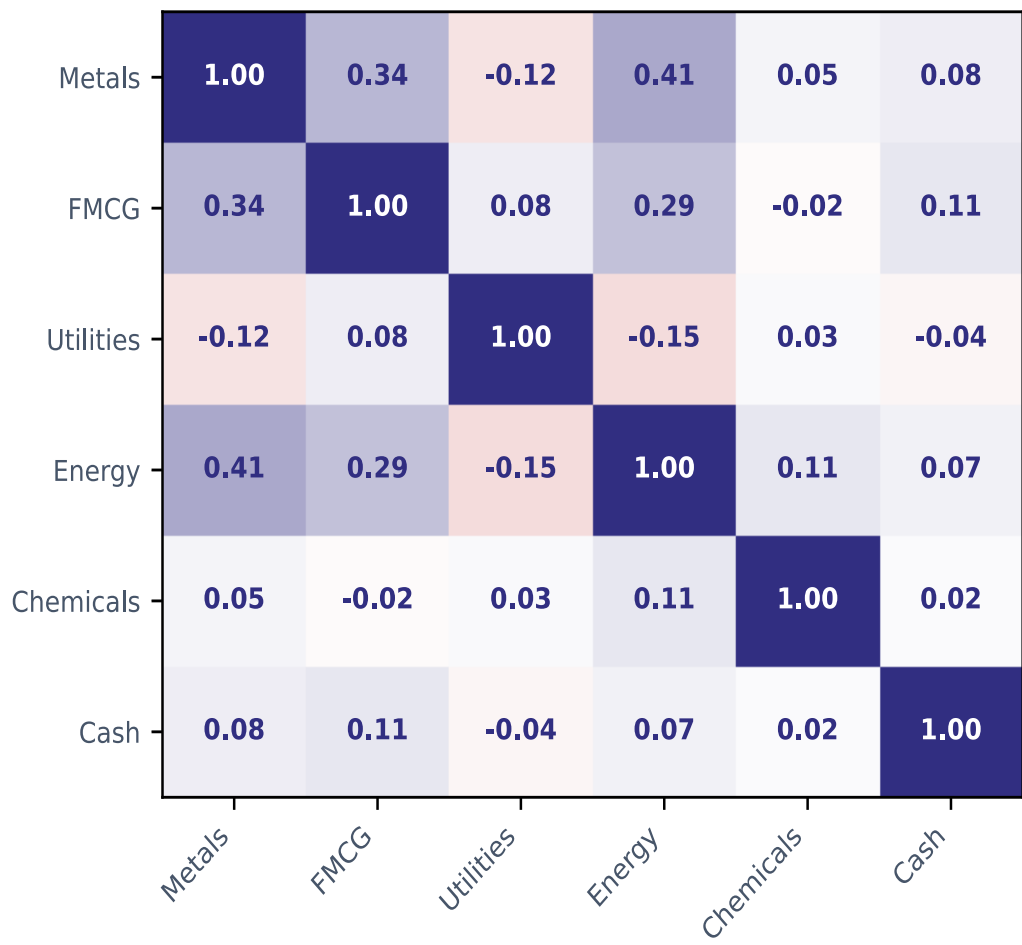

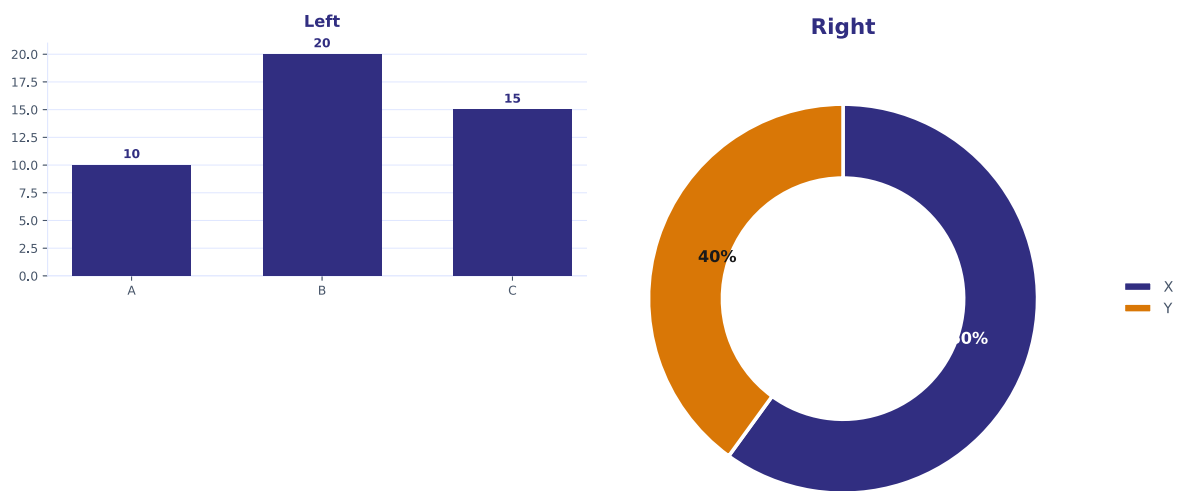

Chart Row — Two Charts Side-by-Side

Declarative Template

The financial_statement template builds a complete report from structured data — no builder calls needed. One line of code.

Input Data Structure

Template input schema

Key	Type	Example
title	str	"Q3 Portfolio Statement"
subtitle	str	"Generated via from_template()"
kpis	list[dict]	[{"label": "AUM", "value": "₹1.2L", "delta": "+4.1%"}]
composition	tuple[list, list]	(["Equity", "Cash"], [70, 30])
table	list[list]	[["Holding", "Value"], ["VEDL", "₹15,600"]]
right_align_cols	list[int]	[1]

Usage

```
```python from pdf_studio import Document data = { "title": "Q3 Portfolio", "kpis": [{"label": "AUM",  
"value": "₹1.2L", "delta": "+4.1%"}], "composition": (["Equity", "Cash"], [70, 30]), "table":
[["Holding", "Value"], ["VEDL", "₹15,600"]], "right_align_cols": [1], } doc =
Document.from_template("financial_statement", data) doc.render("q3.pdf") ```
```

## That's It

Three themes. One template. Zero boilerplate. pip install pdf-studio and start generating.
